

# 4

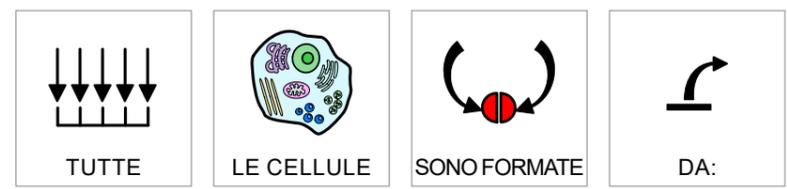

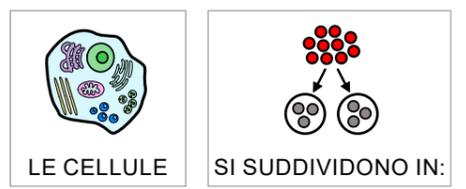

## GEOGRAFIA: **La cellula**

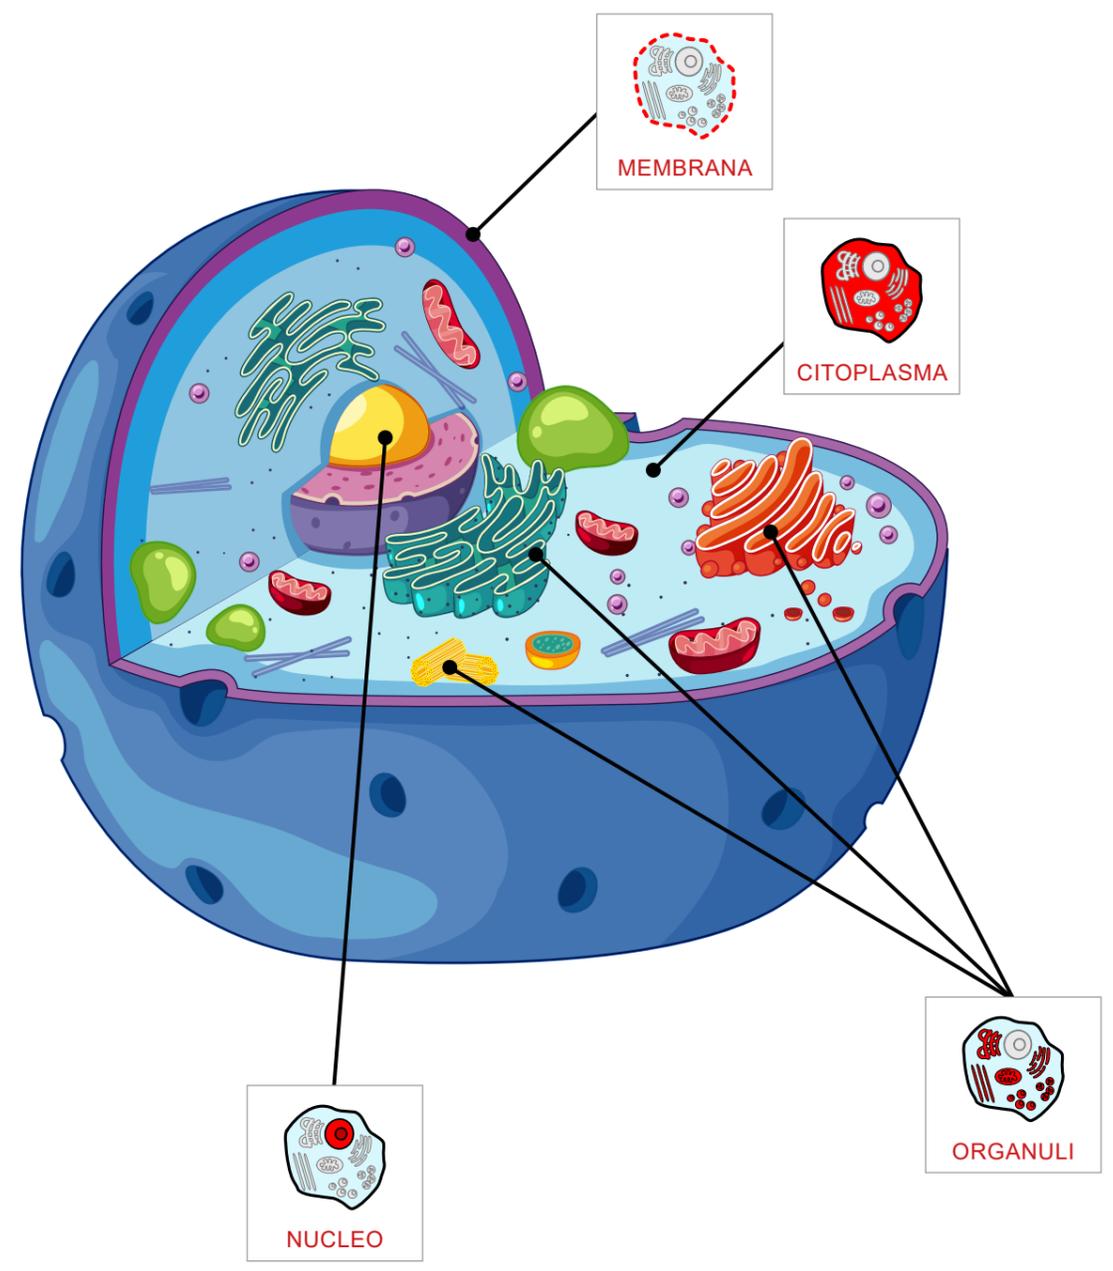

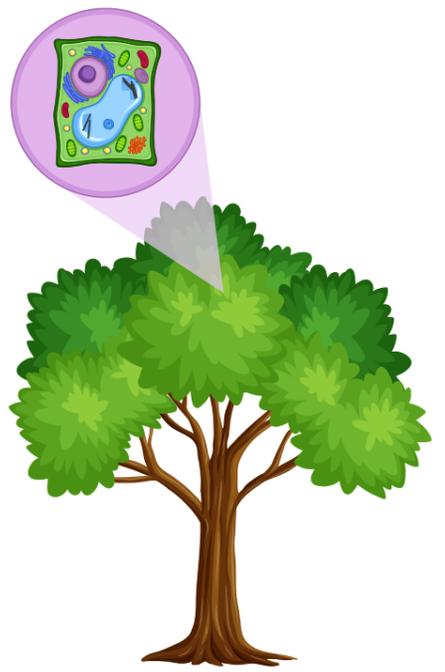

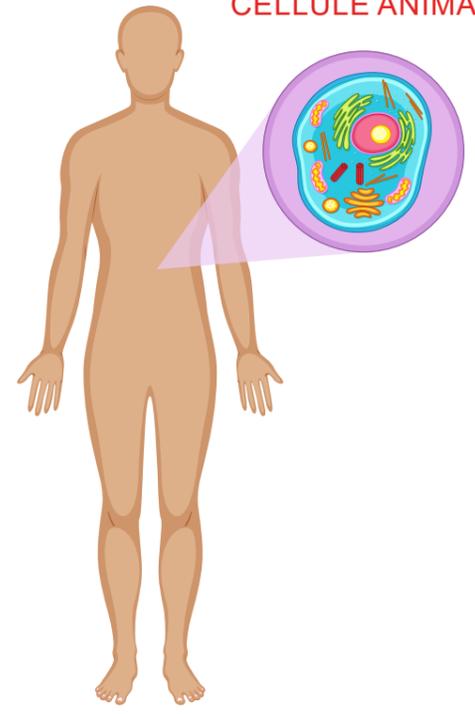

LA CELLULA

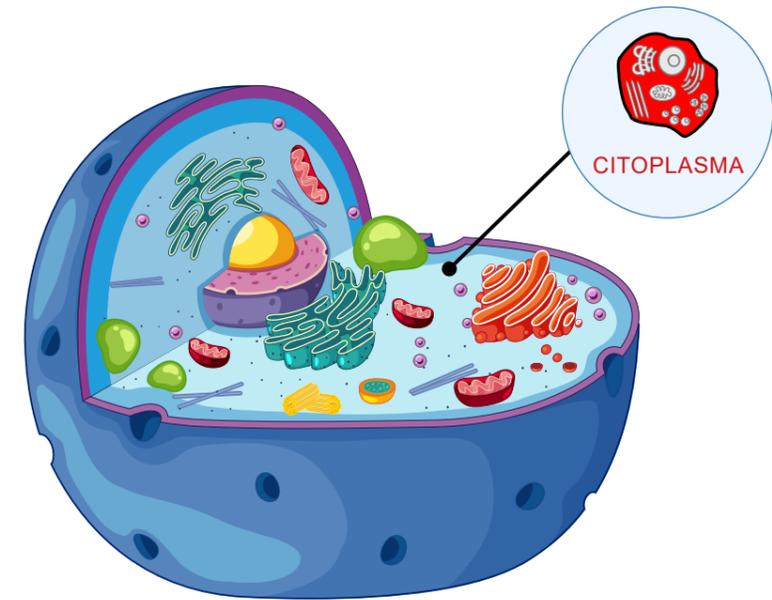

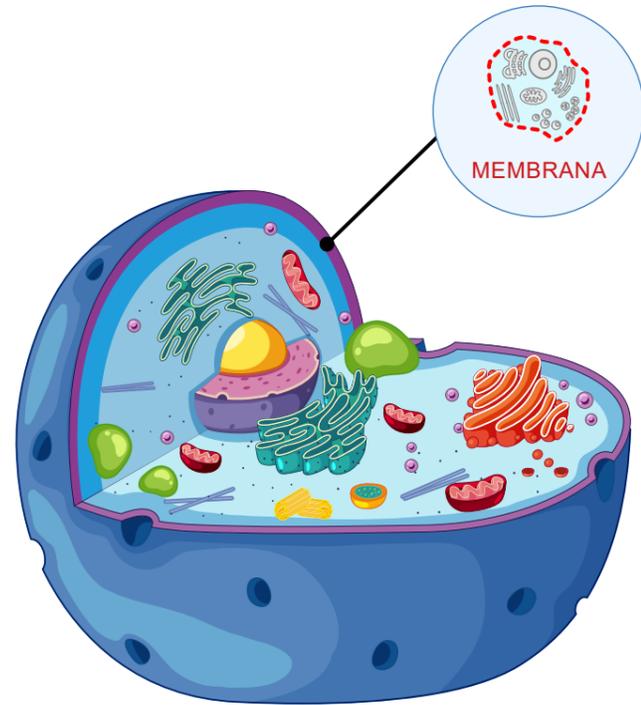

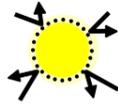

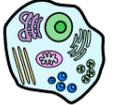

CELLULE ANIMALI

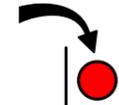

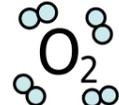

CELLULE VEGETALI

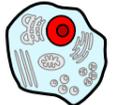

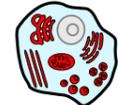

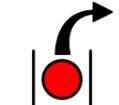

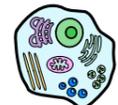

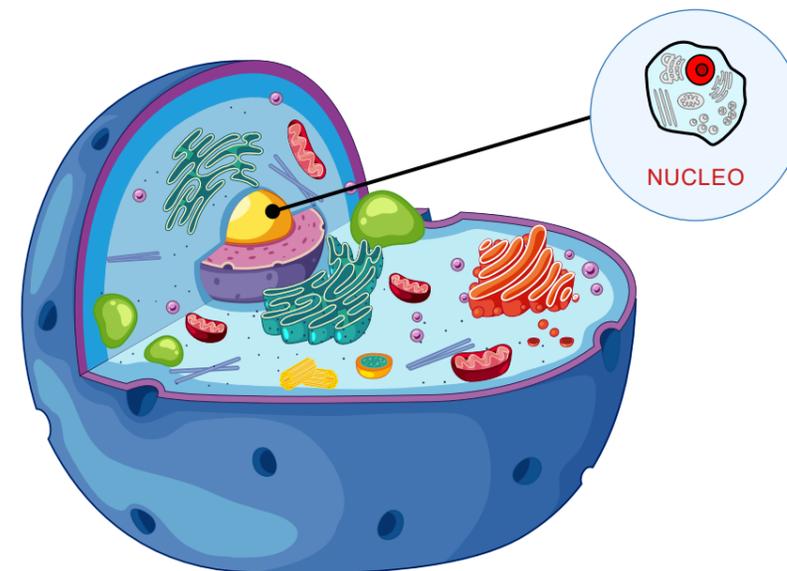

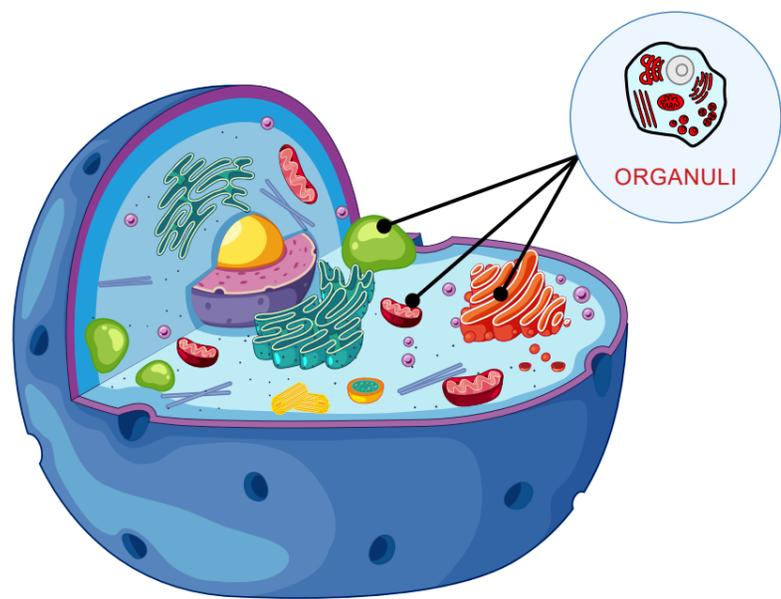

-  AVVOLGE
-  +
-  PROTEGGE
-  LA CELLULA

-  È
-  UNA SOSTANZA
-  GELATINOSA

-  LASCIA ENTRARE
-  OSSIGENO
-  +
-  SOSTANZE NUTRITIVE

-  CONTIENE
-  IL NUCLEO
-  +
-  GLI ORGANULI.

-  LASCIA USCIRE
-  SOSTANZE NOCIVE
-  PER
-  LA CELLULA.

FUNZIONANO  
 QUASI  
 COME  
 GLI ORGANI  
 DEL  
 CORPO.

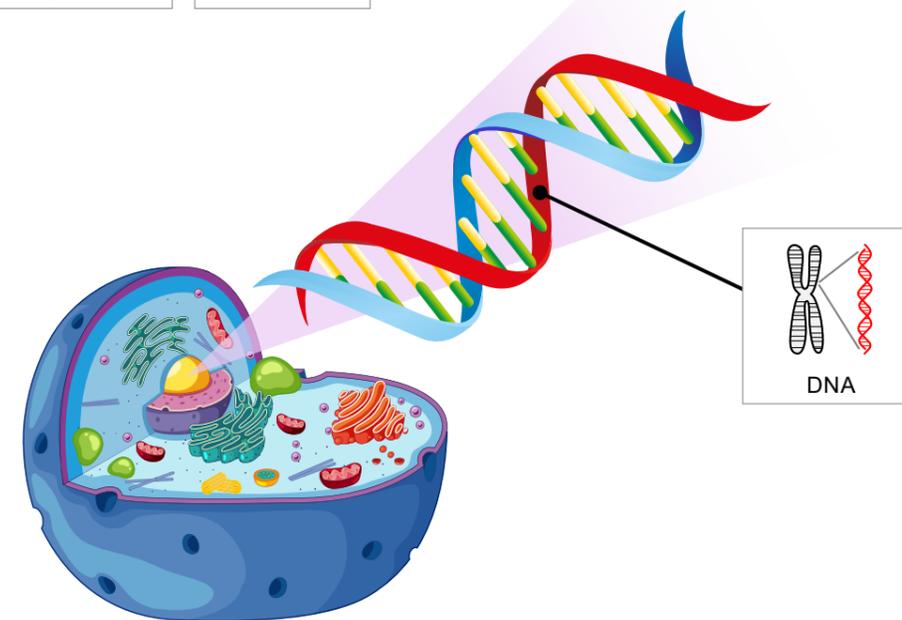

AD ESEMPIO:

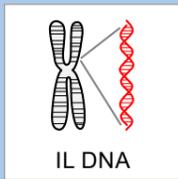

FANNO  
 RESPIRARE  
 LA CELLULA

FANNO  
 DIGERIRE  
 LE SOSTANZE NUTRITIVE.

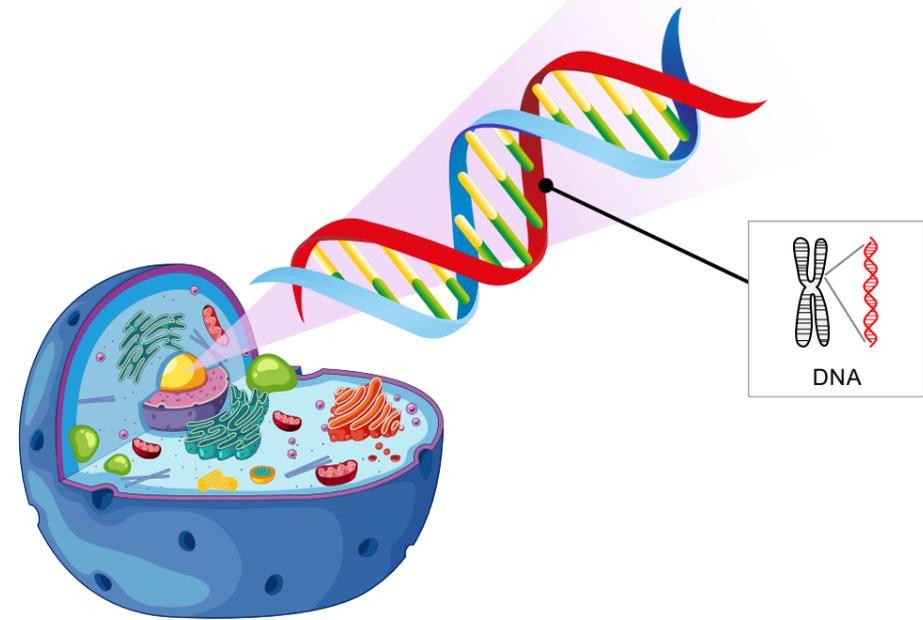

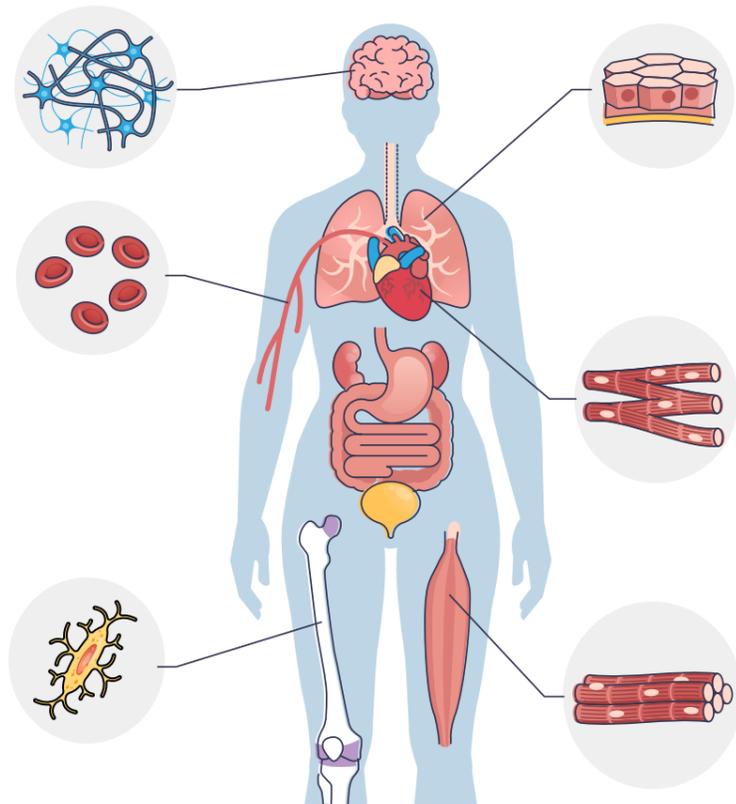

DIRIGE  
 IL FUNZIONAMENTO  
 DELLA  
 CELLULA

CONTIENE  
 IL DNA.

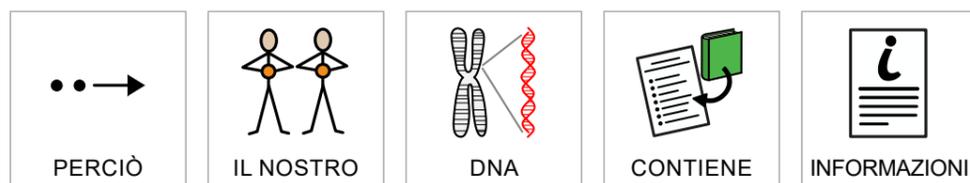

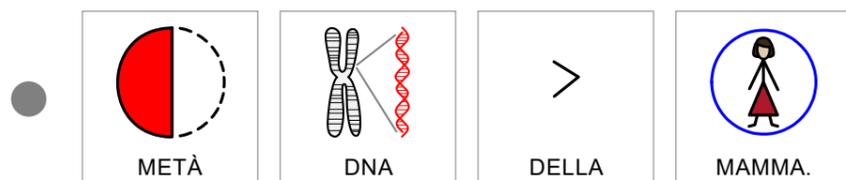

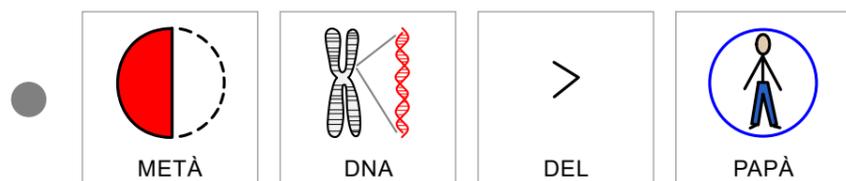

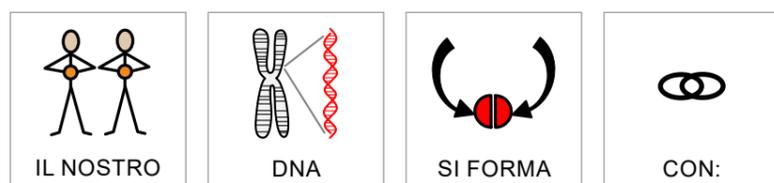

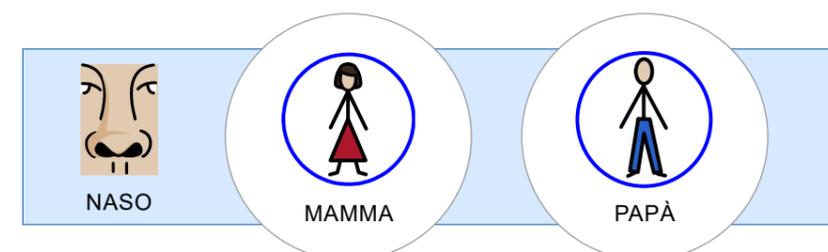

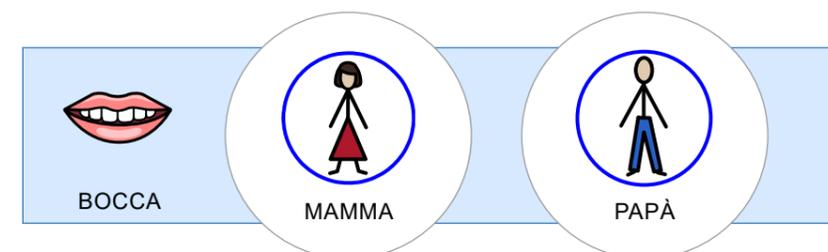

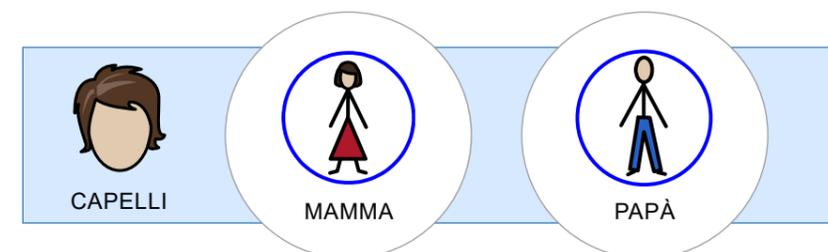

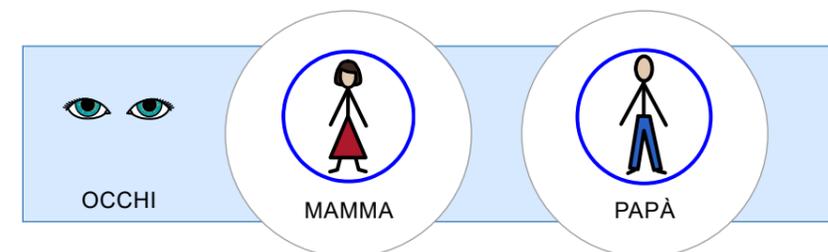

<p>NEL</p>	<p>NOSTRO</p>	<p>CORPO</p>			
<p>CI SONO</p>	<p>CIRCA</p>	<p>200</p> <p>200</p>	<p>TIPI</p>	<p>&gt;</p> <p>DI</p>	<p>CELLULE.</p>
<p>OGNI</p>	<p>CELLULA</p>	<p>FA</p>	<p>UN LAVORO</p>	<p>DIVERSO.</p>	

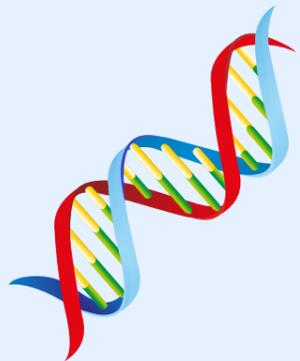

<p>IL DNA</p>	<p>È</p>	<p>COME</p>	<p>UN LIBRO:</p>		
<p>CONTIENE</p>	<p>LE ISTRUZIONI DI LAVORO</p>	<p>PER</p>	<p>OGNI</p>	<p>CELLULA</p>	
<p>CONTIENE</p>	<p>INFORMAZIONI</p>	<p>COME</p>	<p>LA FORMA DEL CORPO,</p>	<p>IL COLORE DEGLI OCCHI,</p>	<p>IL COLORE DEI CAPELLI.</p>

QUALI CARATTERISTICHE DEL TUO CORPO SOMIGLIANO A QUELLE DI MAMMA O DI PAPÀ? SEGNA.

IL DNA SI TROVA IN TUTTE LE CELLULE DEGLI ORGANISMI VIVENTI, DAGLI ANIMALI ALLE PIANTE.

IL DNA È STATO SCOPERTO NEL 1869 DA FRIEDRICH MIESCHER, UN BIOCHIMICO SVIZZERO.

QUESTA SCOPERTA E' STATA IMPORTANTE PER CURARE MALATTIE EREDITARIE, CIOE' MALATTIE CHE PROVENGONO DAI GENITORI.
